

As a qualified candidate you (Print Name: \_\_\_\_\_) will have demonstrated advanced expertise and ability in the field of Laboratory Animal Medicine. ALAVTN requires that a licensed veterinarian, credentialed veterinary technician/nurse specialist (VTS) attest to your knowledge and mastery of the skill. Each person verifying your tasks must complete the bottom of the skills list form to validate their signature. ALAVTN has the right to contact any person that has verified a skill. Skills that are marked as mastered must include at least one case number associated with the skill (if applicable).

ALAVTN defines mastery as: the candidate must be able to perform the task safely and consistently with a high degree of success without being coached or directed no less than 4 times. Mastery requires having performed the task in a wide variety of patients and situations.

The candidate must demonstrate knowledge and mastery of 80% of the skills listed in the nursing and anesthesia categories, and a minimum of 80% of the skills must be mastered of all combined sections on the surgeon skills list, with the exception of the General Surgical skills section, where 80% of the skills in this section must be mastered.

Total number of skills & knowledge list mastered: # \_\_\_\_\_ skills out of \_\_\_\_\_ total, for a percentage reached of: \_\_\_\_\_% I verify the above information and following checklist is true to the best of my ability.
